Subject: PFOS Schedules

Karen,

Below are the UCMR3 monitoring schedules for the three water systems with PFOS issues. I think it may be helpful to you to watch out for the upcoming ones.

Artesian:

- GW sources are required to sample in July 2013 and Jan. 2014 under UCMR3. There will be no more sampling.
- One SW source is required to sample July/2013, Oct./2013, Jan./2014, April/2014. April result yet to be posted to SDWARS. The source so far is fine with PFOS.

Warminster:

- GW sources are required to sample in Nov. 2013 and May 2014. The May result should be available anytime soon. I am wondering whether PADEP should check with the system for the May result.
- The SW source is required to sample Nov./2013 and Feb. May, Aug. 2014. May result yet to be posted to SDWARS. The source so far is fine with PFOS.

United Water:

- The GW source at Airport is required to sample Feb. and Aug. 2014
- The SW source is required to sample Feb., May, Aug., and Nov. of 2014. PFOS Feb. result is fine. May result is yet to be posted.

Michelle

Subject: More PFOS > 0.2 ug/L (Provisional Health Advisory)

Karen,

I just checked SDWARS which contain data reported after April 1, 2014 and additional PFOS were reported:

Artesian Water Company, Wilmington Manor 3 Plant: again on 12/8/2014, 1.8 ug/L

United Water PA: 2/4/2014, 0.363 ug/L (Karen you were right on the number)

All detects of PFOS in RIIL are copied below.

I will check into PFOA.

Michelle
